

End-to-End FTTx / ETTx Open Networking Solution

Transform Rural Broadband with Dorado's Hardware-NOS-Software Integrated Packages

KEY BENEFITS

Streamline Deployment & Scale

- Seamless Migration & Deployment
- Greenfield and Brownfield Support
- Scale Easily

Simplify Operations with Robust Software Capabilities from Cruz

- Monitor
- Automate
- Compliance
- Service Provisioning
- Advanced Monitoring
- Source of Truth DB
- Reduce OPex

Maximum Hardware Choice & Agility

- Cost Benefits
- Plug & Play Flexibility
- No Vendor Lock
- Lower TCO
- Long Lifecycle

Seamlessly Extend Dorado's Solutions

- Corporate Data Centers
- Campus Environments

Cost-Effective for Funding Challenges

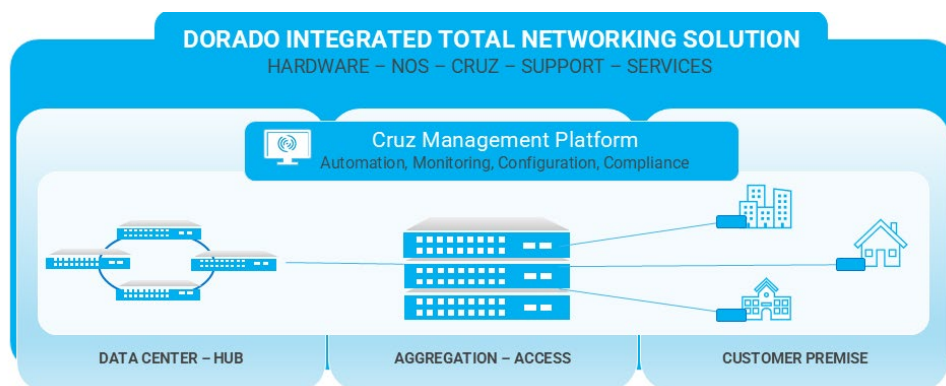

- Designed to meet state, federal, and private funding requirements

Agility for Remote & Rural Areas

- Flexible systems ensure seamless service delivery

Simple, Cost-Effective Network Solutions from a Common Stack Vendor

Dorado's End-to-End FTTx/ETTx Open Networking Solution meets the unique needs of rural broadband provider by enabling cost-effective, reliable, and scalable broadband deployments tailored to your service area. With our **Integrated Total Networking Solution**, Dorado provides **everything you need in one place—networking hardware, NOS, the Cruz management platform, deployment services, and comprehensive support!**

Dorado's FTTx / ETTx Solution

- **Open Networking Architecture** – Unrestricted hardware choices with no vendor lock-in.
- **Cruz Software Platform** – Hardened, user-friendly tools for deployment, monitoring, and automation (deploy on-premises or cloud-based).
- **Source of Truth** – Dorado's comprehensive information repository provides invaluable visibility and control.
- **Service Tuning and Provisioning** – Quickly adapt and provision services to meet subscriber needs.
- **Scalable Infrastructure** – Expand service areas and easily add subscribers.
- **Reliable Connectivity** – Deliver symmetrical bandwidth and dedicated connections.
- **Advanced Troubleshooting** – Proactively resolve issues to reduce truck rolls.
- **Single Source of Technology Stack, Deployment Services, and Ongoing Support** – Ensures simplicity and reliability.

Your Path to Open Networking

Dorado Makes it Easy to Cruz into SONiC

Why Dorado's Integrated Total Open Networking Solution?

Unlock from Vertically Integrated Proprietary Technologies and Realize the True Benefits of Open Networking / SONiC

Dorado Provides a Total Solution:

- **Networking Hardware** – from leading white box manufacturers
- **NOS** – SONiC distributions from Broadcom, Community, and vendor-specific
- **Single Source for Consultation, Service & Support**
- **PLUS Cruz Management Platform** – Backed by our Cruz software portfolio, rapidly deploy new services and networks, simplify and operate SONiC networks without an expert... and easily scale!

Our all-in-one approach guarantees simplicity and reliability, empowering you with the tools and services required for seamless operation – all with no vendor lock!

- 1. Solution Consultation**
Tailored consultation with Dorado experts to understand your organization's unique networking needs.
- 2. Select & Source Integrated Package (HW, NOS + CRUZ)**
Dorado sources from leading hardware manufactures and various SONiC distributions all bundled with Cruz.
- 3. Network Design and Deployment – Error Free**
Let us help you design robust, scalable networks with precision and deploy with minimal downtime and optimal performance from day one.
- 4. Visualize Your Network Topology**
Gain a clear and intuitive understanding of your network with our advanced visualization representations with valuable insights into your network.
- 5. Automate, Control & Monitor NetOps**
Immediately benefit from Cruz management platform to smooth daily operations with Automation, Real-time Monitoring, Alerts, Compliance, Configuration + much more
- 6. Service Provisioning with Continuous Optimization**
Stay ahead of changing requirements with dynamic service provisioning and tuning.
- 7. Scale Effortlessly**
Scale your operations without disruptive overhauls, ensuring your business is always future-ready.
- 8. Single-Source Services and Support**
Convenience of comprehensive, end-to-end service and support under one roof.
